

Light Transforms the World!

Impulse days are intended to bring new impetus to establish a novel form of spiritual teaching and learning with all participants in cooperation. The spiritual teachers will build a common energy field and create this day together. Always together on the stage and open for new, surprising insights and experiences, the teachers will let the subject unfold throughout the day. Guided by them, the participants will learn experientially. The impulse days invite everyone, teachers as well as participants, to set out for new horizons. This will create a space for spiritual catalysts to help people blossom into their expanded soul life, no matter at what stage of development they may be.

The teachers will get together about 30 minutes to 1 hour before the beginning of the day.

The invitation for the participants:

The earthly journey continues – now, at the beginning of the Third Millennium. It is time for each seeker to bring consciously together heaven and earth in his or her own self and share it courageously with the whole of life in this world. It is time to merge our double nature – physical and etheric – in everyday life, so that we can fully express our innate soul gifts, abilities and universal connections here on earth without limits.

Two or three experienced spiritual teachers will set up throughout the day, a common room of light based on one of the themes for the impulse days. Guided by them, the participants will be able to enter into resonance and co-create the day. In this way, each impulse day offers its own spontaneous trajectory and invites the participants to spread their wings. Open yourself for miracles!
